My journey involves a passion for technology. I've delved into fundamental front-end concepts using HTML, CSS, JavaScript, and Angular. However, my current focus lies in back-end development with Java, as my ultimate goal is to become a full-stack developer in the future. but I'm well aware that I need much more than just server-side development knowledge. I also need to grasp concepts of architecture, databases, cloud computing, DevOps principles, and much more.
