---

I am studying web development. I have covered the fundamental concepts of front-end using HTML, CSS, JavaScript, and React. However, my current focus is on back-end development using NodeJS. My ultimate goal is to become a full-stack developer in the future, but I am well aware that I need much more than just server-side development knowledge. I also need to grasp concepts of architecture, databases, cloud computing, DevOps principles, and much more. This is just the beginning of my journey as someone passionate about technology.
